

The Wainwright School

For the Advancement and Well-Being of the Community and District

VOL. XL No. 23

WAINWRIGHT, ALBERTA, WEDNESDAY, APRIL 7th, 1948

Price \$2.00 Per Year In Advance

School Division Issue School Debentures

Minutes of the meeting of the Wainwright School Division No. 32, Members present: H. E. Spencer, T. C. Sanders, H. G. Pollock, F. E. Dixon and Mrs. A. MacLeod.

Moved by Mr. Dixon that the minutes of the last meeting be adopted as read. Carried.

Moved by Mr. Spencer that auditors Patterson, Duncan, McKay and King be re-engaged for the year 1948, and that they be advised of same. C.

Discussion re coal shed and teacherage at the Roror School.

Moved by Dr. Pollock that the teacherage and coal shed at the Roror School be advertised for sale by tender. Carried.

Dr. Pollock, chairman of the Dormitory committee gave a complete report of the meeting held at the office and at the Dormitory during the evening of Thursday, March 24th. Details of existing contract between the Dormitory supervisors and the Divisional Board are satisfactorily understood. A questionnaire will be forwarded to all parents of pupils now residents in the Dormitory.

Moved by Dr. Pollock that we send out a questionnaire to Dormitory Supervision to all parents concerned.

Local Red Cross Drive Not to Close Yet

According to information received by the Star at press time, the Wainwright Branch of the Red Cross is not closing their campaign for funds yet. As was officially announced at the beginning of March, the campaign was to close on March 31st, but due to inclement weather during the month of March, little or no canvassing has been done in the rural districts.

To date the amount collected of the \$100,000 objective for this territory has reached \$107,773, of which \$919.07 has been forwarded to the Edmonton headquarters. As is customary during years past, the campaign for funds is always held during the month of March. 50% of the funds collected go towards the national drive and 15% is retained for use in the district. No definite date has yet been set when the campaign will close, but the Red Cross committee are striving for at least a fulfillment of their objective, and in all probability they will not close the drive until this objective is reached.

With Field Supervisor

W. W. Magdoff

Wable Fly Spraying:

Due to the inclement weather conditions that have prevailed over the district during the past month and also which still prevail, we have been unable to start Wable Spraying on schedule as was planned. There is very little hope of starting for some time yet. Everything is in readiness as soon as Mr. Weather removes his clouds, and the weather is steady and not too cold to risk the cattle.

I would strongly advise anybody with a serious Wable infestation, to Hand Wash their cattle the first time to prevent any Wable dropping to cause re-infestation. Derris Powder can be obtained from your local merchant for hand use. The Co-op Store in Wainwright has a limited amount of Wable Powder for hand use which was made available by the Wainwright and District Agricultural Improvement Assoc.

A good stiff brush and stock comb is all that is needed for applying the Hand Wash.

Feed:

The feed situation is very serious as most everybody knows. Cattle are dying in a number of districts and feed of any description is needed immediately.

Anybody having or knowing of any extra feed is asked to notify this office, in this way we may help to prevent a more serious crisis.

W. Rattray met with the Divisional Board and discussed prices of school buses.

Moved by Mr. Dixon that we advertise re tenders to provide bus service for two van routes operative within the Wainwright School Division No. 32. Particulars of routes to be obtained from the School Division Office, Carried.

Moved by Dr. Pollock, that we tender for prices on school buses, to be operated in the Wainwright School Division, same to conform to the regulations as outlined by the Highway Traffic Board of the Province of Alberta. Carried.

Moved by Mrs. MacLeod that we adjourn. Carried.

The secretary was instructed to supply each member of the Board with a copy of the Assessment figures as forwarded to the M.D.'s towns and villages, for requisition purposes.

Superintendent's Report: Resignations of Mrs. J. Owen, of Heath School and Miss M. V. Jackson, of Hinton, School district. Moved by Mr. Spencer that the Superintendent's report be adopted and that the resignations of Mrs. Owen and Miss Jackson be accepted with regret. C.

Miss L. Thwydy, Health Nurse gave an oral report on the work covered during the months of January and February.

Moved by Mrs. MacLeod that Health Nurse's Report be adopted. Carried.

Financial statement covering the months of January and February with bank balances was submitted to the Board members by the Secretary.

Moved by Mr. Dixon that Financial Statement for the months of January and February, 1948 be accepted. Carried.

Delegation from the Irma School District Board met with the Divisional Board to discuss the matter of equalization of assessments. It was felt by the Board that this matter could be taken care of by the Irma town council. It is expected that the council of the towns and villages included in the Wainwright school division will discuss the matter of assessments together at some future date.

The urgent need for a new school in the village of Chauvin was given continued on page 6

Paints which will require no stirring before use are said to be in the development stage. Until they become an established part of regular life, however, the best advice anybody can give to the would-be painter around the home is "wipe" the paint thoroughly before applying. That is the only way to get the best results out of the paint job, because only when all the ingredients of the paint are thoroughly mixed can each of them do its best job.

Miss Jean Rutherford Honored at Showers

Miss Jean Rutherford a bride of Saturday, April 3rd, was guest of honor at a miscellaneous shower held at the home of Mrs. L. C. Tory on Friday evening of last week.

Some twenty guests gathered and a pleasant evening of contests was enjoyed by all, with attractive little prizes for the fortunate winners. Miss Kay Jones then presented the bride-elect with a dainty basket laden with gifts and expressed the wishes of the gathering for many years of happy married life, to which she very fittingly replied.

A delicious lunch brought the evening to a close.

Mrs. A. MacDougall was hostess at a miscellaneous shower, held in honor of Miss Jean Rutherford at the home of Mrs. J. Rutherford on Tuesday evening of last week.

The guests enjoyed a number of contests after which a pink and white carriage of gifts was wheeled in and presented to the bride-elect, for which she expressed her thanks and appreciation.

A dainty lunch was served after which the gathering dispersed.

Girls Auxiliary Hi-Lites

Trudging along through the fields of knee deep snow the Girls Auxiliary were well on the hike they planned a week before. We were not at all prepared for wet snow, but when we got over the tracks we decided to stay over and that was because we didn't want to miss it, but as we walked along farther out into the field, the snow got deeper and we got colder. On and on we walked far away from the road. We were soon all very exhausted and we all had boots of wet cold snow.

When we finally reached the road we walked as far as the tracks, then sat down and shook the snow out of our boots and started on our home-ward jaunt.

At the hall we did all everything we could to get dry and warm. Wet stockings were tossed over the heaters and bare feet seemed to be popular.

We had a very tasty meal of hot soup and buns. We concluded with a short meeting and tape. —Con.

Spring Care of Bees

One of the first steps towards a profitable honey crop is proper attention to bees in the spring. Alberta's Provincial Apiarist, W. G. LeMaster, says that they should be placed in a protected location, heat conserved by reducing the entrance to the hive, and the hive wrapped with tar paper.

A continuous supply of food is needed to build up the colony quickly. A lack of food may cause the bees to raise a new queen, even though the original one may be all right. This unnecessary replacement of the queen may lead to swarming. The bees should not be disturbed unduly in the spring. The chief requirements are to see that they have plenty of food and that room is provided for the colony to produce brood and store honey.

Local Couple Wed In Church Ceremony

A quiet ceremony took place in St. Thomas (Ang.) Church on Saturday, April 3rd, at 2:30 p.m., when Rev. F. R. Smith read the marriage vows uniting Miss Marjorie Jean Rutherford, daughter of Mr. and Mrs. P. Rutherford of Wainwright, and Mr. Gavin Christopher George Peacock, son of Mr. Gavin Peacock and the late Mrs. Peacock also of Wainwright, in holy matrimony.

Entering the church with her uncle Mr. A. Woodward, who gave her in marriage due to the absence of her father, the bride was lovely in a teal blue gown, dressmaker suit with brown hat and accessories. Her carriage was of Sweetheart roses and fern and her only jewelry a cameo pendant, a gift of the groom.

Miss Pat Rutherford attended her sister as bridesmaid. She chose a dove grey dressmaker suit with blue hat and black accessories. Her carriage was of red and white carnations. Mr. Jack Peacock, brother of the groom, acted as best man.

After her daughter's wedding Mrs. Rutherford wore a grey and rose flowered printed jersey with black accessories and a corsage of yellow roses.

Snow, Cold, Blocked Roads No Let-Up In Sight

Who wouldn't live in Alberta? The only province in Canada where you can enjoy (1) winter all year round. At least that is the feeling of many in the Wainwright district as March came in like a lion and went out the same way, April 3rd saw one of the worst blizzards hit this area to be remembered by many an old timer for some time. A record for cold weather was established in Wainwright this week, as April 3rd started with the thermometer hovering around 14 degrees below zero. The last previous record was made in 1920, when on the same date the low temperature was recorded at 9 degrees below.

Roads at the time of writing are seriously blocked and the Provincial Highway Dept. has no means a lot to travel on. The bus, stayed out from Wainwright to Chauvin on Saturday night last and travelled only to the Hinton, after some difficulty. This was the turning point in their route and after considerable snow shovelling turned around and landed back in Wainwright at 4:40 a.m. Sunday morning.

Train service has been slowed a bit, but are making their regular runs. It is estimated that nearly 1000 tons of snow fell during Saturday and Sunday night.

Improve Farm to Meet Food Crisis Abroad

Modernization Spurred by Special Loans for Farmers

The footpaths of Canadian farmers produce this year's means the difference between health and hunger for millions overseas. Next winter, thousands of farmers plan to create production, although the food is scarce in many places. They'll do it by mechanizing their farms, replacing their equipment, acquiring more livestock, and other improvements.

Many experienced farmers will adopt a proven plan to finance these progressive steps. They'll arrange for Bank of Montreal Farm Improvement Loans. These loans cost only five per cent in interest. There are no other charges. Repayment can be made by convenient instalments over varying periods.

Mr. Smith, local B.C. manager, invites farmers who wish to use their credit in this economical way to see him now. —ADVT.

Eliminate Worry About Marred Table Tops

Heat-resistant varnish on the surface teamed up with aluminum foil under the veneer will eliminate much of the householder's worry about marred table tops due to liquid spills or stains from hot plates or hot spilled liquids in the near future, manufacturers predict.

For some time, it has been known that a thin aluminum sheeting under the top wood of a polished piece of furniture would conduct heat away from any one spot so rapidly that danger of the top being marred is drastically reduced. Now manufacturers are using a new type of cold glue which will overcome previous problems of attaching the aluminum to the veneer without causing warping.

D.C.W.A. Hear Report On Easter Tea

Fourteen members attended the April meeting of Group 2 of the W.A. of the United Church which was held in the Sunday School room on Thursday afternoon last. An inspiring devotional study was given by Mrs. Dobson who spoke on the Resurrection and nature's resurrection in the spring. Mrs. C. Gullikson will be acting president for the next few months.

The report for the two groups who held the Easter tea and sale of fancy work and home cooking, mentioned that about \$120.00 was made. Each group is to have \$75.00 for buying material for the bazaar.

Mrs. Davis will be on the visiting committee this month. All enjoyed the delicious lunch served by Mrs. Patterson and Mrs. Trefrey. Next month Mrs. Patterson will give the devotional, Mrs. Watts and Mrs. Wilbraham will serve. —Cop.

With the D.A.

By J. S. Robblee

Hay Supplies

There is an acute shortage of hay in all parts of east central Alberta this spring. Our heavy snow fall, staying on till this time of year has exhausted all feed reserves of the farmer and rancher. The situation is such now that numerous orders are piling into this office for feed supplies. Orders that there is slim possibility of filling in less than two weeks.

Farmers and ranchers should consider sowing some of their land back to grasses and legumes this year. Cultivated grasses will produce more feed per acre than wild grasses and will produce a better type of feed. If livestock are going to play a part in our farming practice, it is about time that that farm is managed to handle the amount of livestock you wish to keep.

Cow camps and overwinter on wheat straw and a little hay and be expected to produce a strong healthy calf the next spring. Young stock must be fed to keep them growing if economical gains are to be made in the feedlot.

Grass and legume seeds are available at cost through the office of the District Agriculturist at Wainwright. Crested wheat grass seed is in short supply but all other grass seeds are available. A good mixture of grasses and legumes for your district is Bromus 4 pounds, Alfalfa 3 pounds, and Cresting Red Fescue 2 pounds per acre or an alternate mixture if Crested Wheat grass is available is Bromus 4 pounds, Alfalfa 3 pounds and Crested Wheat Grass 3 pounds per acre.

On new business, pumps, wells and water supply were the topic of conversation of the animals and their ability at showmanship.

Work done by both boys and girls during the school year was on display for public inspection. Many of the club members and adults attending expressed surprise at the fine workmanship shown by the boys and girls. Some of the club members expressed a desire to attend the school and take the agricultural or home economics course.

Alberta Schools of Agriculture rank high among the educational facilities in Canada. The course that is offered is highly recommended for all farm girls and boys in the province.

The prospective father-in-law, was interviewing his daughter's young man.

"And what are your prospects?" he inquired.

"Oh, pretty good! Unless your daughter's misled me," was the answer.

Lady Curlers Donate \$400 to Men's Club At Annual Meeting

Approximately 35 members of the Wainwright Men's Curling Club met in the rink on Wednesday evening last to attend the annual meeting of that association. Considering that there were 30 rinks in operation during the season just past, this is considered only a fair showing of interest at this off season period.

President Bradley and Secretary H. Koch were in their respective chairs and upon opening the meeting, the president called for the reading of the minutes of the last annual meeting. These were adopted as read.

The President's report gave some interesting highlights of the season's activities. Dr. Bradley reported that the new sheet of ice had been made, making Wainwright's rink one of the most modern along the line. He stated that the cost of the new sheet had been \$1311.02 and was erected with a good deal of volunteer labor. Of the total amount only \$200.00 is represented by labor that had been paid for. Dr. Bradley complained of the lack of stimulus towards the end of the season, and said that in the next year something should be done to make more interest in curling following the annual bonspiel. It was suggested that the bonspiel be held later in the season, but it was pointed out that the roads were usually in the best of condition at this time of year and that it had always worked in well with other sports in the surrounding district.

Dr. Bradley's big item in his report covered the lack of water which is experienced every year by the Club. He recommended to the incoming executive and officers that steps be taken in the coming year to have a private water supply obtained, even if it means drilling a well. This subject was discussed at length and a committee was appointed to look further into the matter and bring some data to the next meeting of the executive.

The financial report was read by Mr. H. Koch, the secretary, and all things being considered it was what might be regarded as a successful year financially for the Club. Starting out in the season with a deficit of \$100.00 in the club's funds, all bills have been paid, and at the time of settling a credit balance shows on the bankbook.

Secretary Koch read correspondence from the Ladies Curling Club in which the ladies club had donated \$400.00 to the men's club, and the correspondence stated that the ladies club would like this sum to be used to defray the cost of a well and pump to ease the water situation experienced in seasons past. President Bradley pointed out that during the year the ladies had turned into the men's club the sum of \$467.00, which he said was something to be very proud of. A vote of thanks was given and the secretary was instructed to write to the ladies club conveying thanks and appreciation for the splendid support they have given the men during the year, and a special thanks for the \$400.00 donation.

President Bradley expressed his thanks to the business men in attendance for the granting of unlimited credit to the club at the start of the season. He also stated that this season just past saw every membership paid, which is somewhat of a record from the tone of the meeting.

The meeting was declared open for nomination for officers with the following results: President, D. Rattray Sr.; Vice President, Dr. J. D. Wallace; Secretary Treasurer, W. Carl; Ice Committee, A. Kleinmeyer; Bonspiel Committee, P. Armishaw. The last two mentioned names are chairmen in each case with power to add to their committee.

On new business, pumps, wells and water supply were the topic of conversation of the animals and their ability at showmanship.

Work done by both boys and girls during the school year was on display for public inspection. Many of the club members and adults attending expressed surprise at the fine workmanship shown by the boys and girls. "And what are your prospects?" he inquired.

"Oh, pretty good! Unless your daughter's misled me," was the answer.

Feed Situation Serious In This District

Cattle feed in the Wainwright district is fast becoming non-existent as cold bitter weather swept down from the north last week, leaving behind snow, cold and blocked roads. Normally at this time of year many herds of cattle can be put to pasture and will forage for themselves if the snow has not altogether left the ground. This year, as the spring is late and winter drags on, the farmers in the district are faced with a problem which has never been so acute since the winter of 1920.

No more than a limited supply of feed was put into reserves last fall and today the whole territory is feeling the pinch. Rumors have been heard that some farmers in the district are disposing of their herds because of lack of feed.

Many factors are involved in this years feed supply situation. The widespread use of the combine is the largest single contributing factor. As the straw is left on the ground instead of being utilized as feed, it is expected that in future years more straw balers will be employed to follow the combines in the field, picking up and baling feed, to be used later in the season. Much more hay could have been cut and used from the park hay meadows last year if the farmers had foreseen the need that has developed.

Mr. F. Maddox, Field Supervisor for the M.D. of Wainwright, describes the situation as serious, and claims that efforts are being made by the authorities to import hay and straw from neighboring provinces. He describes the situation as being almost hopeless and urges anyone who has more than enough feed for their own requirements to contact him as soon as possible.

Library Notes

"This workaday world is so trying at times
Folks chatter and equabble like
rocks
So the wise flee away to the best of
all climes
Which you enter thru' History, Mem-
ories or Rhymes
That most wonderful Country of
Books"

Perhaps some of the most fascinating reading we have is told in the stories of real men and women. Here are some of the biographies to be found in the Library.

"Abe Lincoln Grows Up"
Carl Sandburg
The story of Lincoln's boyhood and boyhood at Knob Creek farm and on the Mississippi until at nineteen he leaves home to make his fortune at New Salem.

"A Girl in White Armor"
Albert Bigelow Paine
Joan of Arc—the little peasant girl who crowned a King of France.

"A Star Deacon"
Gertrude Lawrence
Gertrude Lawrence tells her own story of her life on the English stage in our own time.

"Madame Curie"
Eva Curie
Eva Curie tells the story of her mother, who gave radium to the world.

"Cleaning In The West"
"The Sirens Feet"
Nellie L. McCung
The first volume tells of life in Ontario and pioneering in Manitoba. The second volume tells much of the struggle to get the vote for women.

"Winston Churchill"
Rene Kraus
To the many who consider Churchill one of the greatest of living men this biography will be a rare treat.

"Rosa Parks in the Gleanings"
Sir Harry Lauder

Town Hall, 8 p.m. P.M.C. PUBLIC MEETING Friday, April 9th

The Wainwright Star

For the Advancement and Well-Being of the Community and District

W. C. Huntingford, Editor & Publisher
Published at 422 Main Street, Wainwright
Every Tuesday Afternoon.
An Independent Weekly Paper

WAINWRIGHT, WEDNESDAY APRIL 7th, 1948

WHY THE MEETING ON FRIDAY

As will be noted by the advertisement in this issue of the Star, and hand-bills in the business section of the Town, everyone who is interested in the erection of the P.M.C. is urgently requested to be on hand Friday night at the Town Hall to make a decision of importance.

At the annual meeting of the Peace Memorial Society only a fortnight ago, it was moved, seconded and after considerable discussion carried, that the plans of the proposed arena be altered so that a free, unobstructed view may be afforded by the moving of the supporting pillars at least six feet back from the ice edge. These were the instructions given the newly elected executive as they took their place of office for 1948.

At the first executive meeting called shortly after the annual meeting, the question again came up for discussion as to whether the plans should be scrapped, which they would have to be, if the recommendation of the annual meeting were to be carried out. The one huge factor to enter upon the scene is the cost involved. While nothing definite has been received by the committee as to the added cost of an additional 12 feet of roof truss, for 12 or 13 trusses, it is estimated that this would run well near the \$60.00 to \$75.00 figure per truss. If a new set of blue prints were to be obtained, which they would, this cost will run close to \$1500.00.

It is quite well understood that it is only good business to profit and improve on somebody else's mistakes, and when such a mistake as pillars on the ice edge which have proven unsatisfactory in arenas already built throughout the province it might be wise to heed the above advice and make the plans to provide a clear view of the ice sheet at all times and disregard the added expense involved. The money would probably be raised anyway, and as this project is to last for at least 50 years, barring no accidents, it is felt that the extra cost would never be noticed at the end of that time.

On the other hand it is equally good business and every one will agree that a private individual would not build a house or building beyond his financial means. Then why should it be expected to do likewise on a public building of like nature. At the present time, the committee in charge of seeing the actual project started are handicapped by the lack of funds and much more money will have to be raised before a start can be made. Also the time element of obtaining new plans is involved, which would delay actual construction a short while. To put it in bold print, and the real reason of the public meeting: Is the citizenry of the Wainwright district willing to add to the already high expense of building an arena by making a modern building with unobstructed view, or do they think it best under the circumstances to continue with the plans at hand, hoping that in the lower cost some way will be found so that a start can be made on this memorial to our war dead, as soon as the snow leaves. It is up to you. It will be your meeting. You make your decision now and turn out prepared to voice your views.

We think we have presented the sides to the question as fairly as possible taking into consideration the factors involved, and at this time can only think of Abraham Lincoln when he said, "Rule of the people, for the people, by the people." There can be no truer meaning of democracy on Friday night at 8:00 p.m. Make sure that nothing hinders you from voicing your opinion in a matter pertaining to YOU.

THAT RADIO QUESTION

Alberta is a wonderful province. Alberta, with the exception of Mr. Drew's Ontario, seems to be in hot water more times than anyone else, in the eyes of the Dominion Government. No sooner has Ottawa half granted one concession to the people of this province regarding the "Net Worth Statement" of farmers, than it turns around and in the next instant raises another issue which keeps the people crying to the Dominion authorities that another injustice has been done. The recommendation of the C.B.C.'s board of governors to grant a French language radio station in this province, is the latest of considered injustices. At the present time however this action will have to be approved by the Department of Transport, who has the final say in such matters. Alberta has spoken in no uncertain terms against the granting of this permit. Premier Manning hearing of this action, voiced that it was indefensible and discriminatory and a flagrant violation of the democratic right of the people of this province. At recent conventions of the A.F.U. action along such lines was condemned, not to mention the voicing of opinions against such actions through the press of the province.

It is hard to determine the action of the C.B.C. in granting a permit for a French radio station, on the grounds that they have consistently refused to grant a commercial license to the people of Alberta for their own station, CKUA. Their excuse was, and we quote, "the granting of another permit in Edmonton would seriously affect the financial status of the two already existing stations now in that city." Why then a French station which will be located in Alberta's capital? The argument of the A.F.U. is that English is the official language of the province, and the institution of a two language facility such as a radio station, is a weakening force encouraging

by ottawa observer
Members of Canada's parliament went home to their constituencies last week with a good record of accomplishment. Two bills caused a great deal of heated controversy, a revision of the Canadian wheat board and the excise tax bill to protect Canada's dollar position—and both were passed by substantial majorities. The bills which continued some of the wartime controls, including domestic rent and evictions controls, were passed in spite of considerable opposition.

Supporters of the continuance of domestic rent controls argue that landlords are now able to keep their property completely rented, whereas the average rented space before the war was considerably less than 100% of the available space. This they argue, amounts to a reasonable rental increase to offset higher maintenance costs. In addition to this a 10% increase was allowed last year on two year leases. It is pointed out that the housing shortage is caused by the policy which directed all supplies toward the war effort for five years and no one should expect to gain from this situation.

Another subject bringing public attention is what is considered to be the government's policy of anti-cyclical budgeting. In a few words this is the plan by which the government—having regard to the rise and fall of both domestic and international trade—leaves taxes at a rate which will produce surpluses when the national income is high, and reduces taxes drastically, and spends heavily on public works, when there are necessary to ward off depression.

Many argue that it is not in the public interest to reduce taxation now with the national income over 9 billion dollars. That government policy should be to raise revenue when money is available and to reduce taxation when money is "tight" in spite of a greater need for revenue. Then many remember the disaster of the early 1930's when the government of the day increased tax rates to meet relief needs, etc., at a time when the national income was low. They claim that the action of the government greatly increased the depression which arose from causes outside Canada's borders.

Is it possible in a democracy? In spite of a general agreement as to its value in preventing depression and maintaining a good standard of living, the question now arises: Is cyclical budgeting possible in a democracy? Left wingers argue that only an authoritarian government could carry out such a policy. They claim that pressures for tax reduction in good times would prevent any democratic government from building up the necessary surplus to meet a depression threat. This claim is similar to Hitler's belief that the democracies were "decadent" and could not act quickly enough to protect themselves against his aggression. All admit that it is a supreme test for people who believe in freedom.

An expert speaks
When this question was put to Dr. MacGillivray, Professor of Political and Economic Science at Queen's University, and wartime editor to the Minister of Finance, he said: "Something would depend upon how well the people understood what the government was trying to do. I emphasized that there would need to be at least an effort made to explain a policy of this kind—at least the effort that the government put in to explaining the price policy during the war, an effort which paid such high return in the compliance of the population and which was I think a

division rather than unification. There is no possible justification for the granting of a French Station license. Certainly not from a population angle. According to the 1946 census there were 557,512 Albertans claiming English as their mother tongue. There were 28,000 claiming French as mother tongue. If such a move were made, and the actual granting of a French radio station were made, it might set a precedent which would be hard to stop once in motion. From the sheer weight of numbers, the Ukrainians far outrank the French. Again the Scandinavians have a considerable strength throughout the province, but we would tend to doubt that either of the two above races would ask for such a privilege, for they realize that in Canada, and especially western Canada, English is the official language and they are content to learn it.

It is to be hoped that the Department of Transport will make no move to sanction the C.B.C.'s recommendation, rather it is to be hoped that the Department of Transport listen to the voice of the people of this province. What Canada needs more than anything is unification. We doubt that if the above would be a step in that direction, in Alberta at least. What do you think?

IN OUR TIME

Well, there's our new mechanical salesman, Sibley—it has a built-in reminder and keeps on telling until the woman screams "T.L. BUY IT!"

Do You Remember?

Taken From The Star Files

TWENTY YEARS AGO

April 11, 1928
George Fletcher, son of Mrs. T. Colby, of the Plaxford district, had a very narrow escape from death by fire on Friday evening when the granary in which he was sleeping caught fire. Several burns to his hands and face were sustained.

Mr. W. J. Goulet, proprietor of the Wainwright machine shop is installing new machinery in order to keep pace with the increasing amount of business coming his way.

FIFTEEN YEARS AGO

April 11, 1913
The U.S. navy dirigible Akron, largest air cruiser in the world, was stricken down over the Atlantic Ocean off Barnegat N.J. last week, by a bolt of lightning, with a staggering loss of life. Seventy-four of the seventy-seven men and officers aboard have been given up as lost.

TEN YEARS AGO

April 6, 1938
Mr. Frank N. Palmer, who for many years has held the same position in Chauvin, has been placed in charge of the Imperial Oil Agency in Wainwright. Mr. Palmer is replacing Mr. R. B. Smith who is leaving shortly for Vermilion.

A splendid attraction at the Buffalo Cafe is receiving much attention this week. It is the new electric automatic Wurlitzer which gives a choice of 16 popular tunes at a nickel a piece.

FIVE YEARS AGO

April 1, 1943
Meat rationing for Canada has been announced in the House of Commons in Ottawa by Finance Minister Daley, commencing May 1. "Meatless days" will also be observed by hotels, restaurants and other public eating places.

much more difficult system to understand than what I am suggesting. If a person understands and has confidence that your higher tax rates are to be followed by an easing of the tax rates should business recede, I see no reason for any hinting of incentive."

The following articles were extracted from advertisements through the Star: Swanwood, Cake Flour, pkg. 35; Kraft Dinner, pkg. 20; Cornmeal, Cocoa lb. 27c; Heinz Tomato Juice, 2 tins 25c.

Joe Rutledge Says

THE QUEEN'S COUNTRY

By Joseph Edgar Rutledge

"In our country," said Alice, "you'd generally get to somewhere else if you ran very fast: for as long as we've been doing."

"A slow sort of country!" said the Queen. "Now, here, you see, it takes all the running you can do to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that!"

There are a lot of businessmen and industries, great and small, that are as puzzled as Alice. They have been running very hard, exerting themselves to their utmost, and they are just where they were a year ago. When they started to run all the prospects looked promising. But other besides themselves discovered that fact. Civic and governmental officials, with no necessity to show a great concern up new expenditures. Possibly they were not bad expenditures, but the added taxes on the assessment and the added taxation sent profits out of the window. Facing such demands, or coincident with them, labor, caught by the maddish over prices, figured it a good time for renewed price demands. Every country argument they met by saying: "Take the increase out of profits."

What they have not realized is that these profits, out of which higher wages, increased civic taxes and governmental imports are to be taken, are not other's justifications for these demands or equal to them. Such profits have been made out of the enthusiasm and vision and capacity of management, that has provided labor-saving devices and has inaugurated new methods that the same workers throughout the province greater returns. As these demands recur and increase the best efforts of management cannot always find the means to provide this increasing return. The result is a grim race—like Alice's—to get nowhere. Everyone admits that labor needs an incentive to work but not everyone is ready to admit that management and capital need an incentive too; management, the tangible evidence of profit to prove that their thought and enterprise and enthusiasm have been justified; capital, the rent for the money that is hoarded in the enterprise. These two are partners with labor. If they should lose interest, what happens to this third party, to which most of us belong? Isn't it time for us to realize that nobody benefits, for long, from effort that gets nowhere? And isn't it time for us to escape from the Queen's country, where it takes all the running you can do to keep in the same place?

Strange Springs

Now that the open road begins to beckon again, National Health authorities pass on this safety tip for those away from home. They say, "Whenever you travel into an unfamiliar countryside, carry your own water supply in thermos bottles. Don't drink from any old stream or strange spring which you may discover. They may be contaminated, and you don't know their source, even if the water looks cool, sparkling and inviting."

The Editor:

May I use a small column to attempt to clarify what I believe to be basic questions for the P.M.C. public meeting, next Friday.

Firstly you have about \$21,000.00 to spend. If you show your interest in P.M.C. by attending this meeting you can help decide on its expenditure. At the present time the Town of Wainwright owns only one site, already levelled and in use as a playground. Little cost is involved in developing it to start erection of the arena there.

Another site, south of the present rink area, can be purchased at an initial cost of \$1000.00 for two lots, (owned by a Canny Scot in Scotland), then levelled at about \$300-\$500—later the balance of the flat part of the block must be acquired from the Mayor and other owners.

There is little to choose between the sites insofar as position or terrain is concerned. (1) In the site of the present skating rink worth the money needed to buy it? (2) To build a rink as presently proposed with posts (obstructing the view of spectators) along the edge of the ice area, is estimated locally to cost about \$24,000.00 without lighting, plumbing or heating installed. To build a bigger arena with posts back 6 feet from the ice area (for the ice area could be made smaller at no extra cost) would possibly cost an additional \$1000-\$2000, depending on how this is accomplished. (3) As it worth the extra money now to provide a rink to be used in future for Wainwright's spectator events in the building such as stock shows, carnivals, boxing matches and hockey? (4) Finally, if you decide to buy a site and build a better rink, how do you suggest getting the money quickly, so that construction can get started?

An alert and informed opinion must accompany any real democratic decision, to prevent any small faction or any "expert" from steering a Wainwright \$25,000.00 expenditure into ways possibly not envisioned by the founders of P.M.C. Every organization that helped to acquire this fund should be represented and ready to make responsible decisions on giving the P.M.C. arena started this year. This is the meeting at which to do your talking.

KENNEDY TORY

To the Editor of the Wainwright Star.
Each time Calgary Power Ltd. send a bill to a customer a small blue folder is enclosed with it called "Rocky Reader". It has been and will be the sincere hope of the company that the contents of this folder is read and at least is a little beneficial to our customers.

Only last week Rocky Reader came into almost every home in Wainwright along with thousands of homes throughout the province. In this particular issue there was printed an article on flying kites and warning of the danger.

In spite of this timely warning a

sample of what happens when common sense comes along on a promotion took place right here in Wainwright on Wednesday, March 25. Luckily no extensive damage was done but I would like to point out what could have very easily happened.

Two boys got their kite tangled around our line in the east end of town. This particular line consists of four wires carrying twenty three hundred volts and two wires carrying two hundred and twenty volts and a neutral ground. The kite, made up of paper, wood and rags was wound around all seven wires in the centre of a span and as it lifted, the wires were pulled together in a cluster.

Two wires carrying twenty three hundred volts burnt off and fell to the ground. The ends lay on the wet ground sparking and smoking until Calgary Power men arrived to cut off the power.

There were several small children around the spot but luckily they were kept clear by the bigger boys, who owned the kite. It would not have been necessary to touch these wires if the danger had not been there. But only to tug on them on the wet ground there could be enough current in the ground to force them to their knees and perhaps be fatal.

That was not the only danger resulting. Another one was possibly far more reaching, consequences were unfortunately avoided. Those twenty three hundred volt wires were hanging onto the low voltage wires and, approximately, sixty five homes, sixteen business places, the fire hall and part of the C.N.S.R. Do you realize what that means? It means that only the small amount of insulation on the wires prevented seventy three hundred volts entering all these homes and business places in town. The danger to life and property is too great to even estimate.

It took two men, four hours to repair the damage done to our lines in a bitterly cold wind and was done without an interruption in service. I might add here that an interruption of considerable time to the whole town was justifiable in this case where high tension lines had to be worked off and the work was done without subjecting the line men to the work on live lines.

I am sure the two boys in question have learned their lesson and wish to commend them on their action of showing responsibility to us and standing by to keep away smaller children.

Thank you, Mr. Editor.
W. C. MADILL,
District Manager,
Calgary Power Ltd.

Keeping Young

It has been wisely said that "Age is neither a visitation nor a penalty, but rather an accomplishment and a fulfillment." Health authorities say that, to grow old gracefully—to welcome the silver threads—requires compliance with commonsense health rules applicable in one's age, type, occupation and constitution. Many of the physical problems of aging can be anticipated, they tell us. The best way to prevent the degenerative diseases is to catch them about before they get a good start. A semi-annual check-up by the doctor will ensure that.

Baking Pans are Important

This may be the answer to some of your baking failures. Mrs. Vera McDonald, Supervisor of the Home Economics Division, Alberta Department of Agriculture, says that baking utensils of various materials act differently. Glass, porcelain enamel, and earthenware utensils hold the heat and bake more quickly, so that a cake baked in these may be overdone, undersized, and dry in texture, unless the temperature of the oven is reduced by 25°F. below the recommended temperature. For example, if a recipe calls for baking at 375°F., reduce the temperature to 350 and increase the time by five minutes.

Very dark cake pans, varying from blue to black, behave much like glass. Unless baked at this lower temperature, cakes are apt to be overbrowned, burnt around the edges and dry.

On the other hand bright, shiny metal pans seem to delay baking. Until the shine gradually dulls with use, darken the bottoms of the pans lightly with a candle smudge. Or, in the case of new tinware, season it by partially filling with water and placing in a moderate oven for 20 to 30 minutes. Repeat several times until the pans darken.

Many of the new aluminum pans have a dull finished bottom and these may be used at the recommended temperature.

In baking pies there is no need to change temperatures for various types of pie plates, although bright shining metal plates must be darkened to obtain a crisp browned lower crust. If only one pie is to be baked, it is best to place it on a rack in the lowest or second lowest shelf guide of the oven.

When placing cake or bread pans in the oven they should not touch each other or the sides of the oven. If four pans are baked, stagger the pans on two racks so that neither pan is directly over the other—also place the oven racks equally distant from each other and from the top and bottom of the oven. This allows the heat to circulate around the pans for more even baking.

Canadian Garden Service

Lawns should be Centrepieces

All informal garden layouts, and the informal type is almost invariably the best, are built around a piece of lawn. Even in the very tiny city gardens, this makes the most effective treatment, the level stretch of green grass setting off the flowers, shrubs, vines and trees which surround it.

If at all possible one should avoid straight lines in these surrounding beds of shrubbery and flowers, though rigid fence lines and driveway lines sometimes make this difficult. Experts advise, however, a curving front to the flower beds rather than a straight one, and both flowers in this and any

shrubbery should be planted in clumps rather than in rows. Generally small flowers and smaller shrubbery are brought to the front, though there should be a little variation in this rule just for variety.

Screen At the back of the flower beds, along the fences or in place of fences one can use growing screens. These may be in the form of permanent hedges, shrubs, vines or high-growing annuals. Even a fence or wall in good condition will look more attractive if partially hidden in this way, and as for the more common type which is not so attractive it can be completely screened by annual or perennial vines. There is all sorts of planting material available for this purpose and found listed in any good catalogue. The perennial types are well known. Many people do not realize that one can get quite good and quick results from annuals too. Dahlias, ornamental sun flowers, cosmos, spider plants, are only some of many things that will reach three or four feet in height in a few weeks. And there are quick-growing vines too, like scarlet runner beans, sweet peas and morning glories.

Grow Fast for Tenderness The only secret of tender vegetables is quick, unchecked growth. This means planting at the proper time, not too early with tender things that frost or cold weather may check, and they must be harvested when just right. One is advised to push growth along with plenty of cultivation, some fertilizer, and watering when necessary and if possible. It is also a good plan to spread sowings out over at least several weeks so that young stuff is coming along continuously. Another is to plant several different types—an early maturing sort, a medium and a late.

Faiths and Driveways Even where paths are not absolutely necessary they will add interest to any garden. But they should not be too obvious, and if one wants a curve or two in them then there should be some excuse for that curve, such as a tree or group of shrubbery. What the path will be made of will depend upon how much traffic and

what materials are available. Good firm soil will take some wear and if dry will carry an occasional car. For more permanent results and heavier traffic, flag stones, bricks, crushed cinders or well packed gravel are all suitable. Where these act as driveways as well and carry heavy traffic some foundation and drainage is advisable. To keep down dust and weeds in driveways there are many good weed killers on the market. Common salt is also used for this purpose and has the additional advantage of binding the gravel or cinder and discouraging frost.

The color experts have come up with a tip that can be a big help in making that long, narrow room look more inviting. They suggest that such a room can be made to look wider and shorter by painting the two end walls a darker color than the long side walls. By the same token, square rooms can be given the illusion of extra length by painting the end walls in a lighter shade of the same color as is used on the end walls.

WORLD CHAMPION PRODUCER

Milked with McCormick-Deering Milker

1,409 pounds of butterfat in one year, from 27,745 pounds of 5.08% milk. That's the record that won the title of world champion producer for Alcester Gerbin, five-year-old purebred Holstein owned by Hays Ltd., Calgary, Alberta, Canada.

"Alcester Gerbin has been milked with a McCormick-Deering Milker for 10 months of her record-shattering performance," says Harry Hays, president of Hays Ltd., "and, as far as we know, this is the first time a record has been made by a cow milked with a milking machine. . . . We have been using a McCormick-Deering Milker for our herd of purebred Holsteins for the last seven years and have been well satisfied with its service and performance."

Ask us how a McCormick-Deering Milker and a program of Managed Milking can help you get the maximum production from your dairy herd.

EDGERTON

The free picture show tickets were won by Don Gordon, W. F. Gordon, Geo. Hallett and Leo Jones. These tickets were donated by Bob McKay of McKay's Lumber Yard and the winners may pick up their tickets by calling there. The ballot box is at the Co-op Store this week.

Mr. and Mrs. Bonnie Arneson held a farewell party for Mr. and Mrs. Vern McCaughy who are leaving the district.

A farewell party was held for Howard McCormick at the home of Mr. and Mrs. Earl Hallett on Saturday evening.

Mr. and Mrs. Stan Steele were visitors to Edmonton last week. Gordon Bulmer made a flying trip to Red Deer last week and returned with a truckload of machinery for Mel Nordin.

Mrs. Montgomery, Jimmy and Sandra have returned from a three-week tour where they were making their first house.

The Red Cross Drive is still on, however reports indicate that the response has not been as anticipated. This may be due to the fact that the canvassers have not been able to get around due to bad weather and road conditions. The need is great, so do not wait for a canvasser to call on you. People of Edgerton and District may leave their donation with Mrs. Kingston at Central office.

The play and dance which was to have taken place on Wednesday, April 7th, has been postponed until road conditions are better. Watch for the date.

Several exciting Pin Games have taken place at the Curling Rink during the past week. It is rather late in the season to be curling, however the ice is still there.

GERALD

The last meeting of the Farm Forum for this winter was held at the home of Mr. and Mrs. L. Myggland. A questionnaire concerning the type of programme and the subjects to be discussed for another year, was filled in. Such subjects as "The Income Tax and the Farmer", "The Farmer and Atomic Energy", "Health", "Education", and "Rural Electrification" were suggested.

Lunch was served by Mrs. Myggland. Miss E. MacDonald has been away for the Easter holidays to her home in Alameda and returned on Monday. Mr. and Mrs. A. LaFrance are now living on the syndicate farm north east of Trafalgar school.

Mr. J. Perkins and Mr. D. Rattray left on Friday for Edmonton where they will attend the Spring Stock Show. Mr. Perkins is exhibiting a number of pure bred pigs.

Now that April and the crows are here, winter seems to be just beginning.

GILT EDGE

Mr. Alf Muddle was a visitor to Edmonton on Monday last week returning home on Tuesday.

Little Miss Pat Kitchener spent a few days of her Easter holidays with her uncle and aunt Mr. and Mrs. Elwood Plaxton.

Mr. Verne Trotter was a caller at the home of Mr. and Mrs. Stuart Plaxton on Wednesday.

Mr. and Mrs. Kip Fletcher of Fabyan visited with relatives in the district on Wednesday.

Mr. Ed. Plaxton and Mr. G. Grech each took a truckload of stock to the Edmonton Spring Show and sale on Saturday last.

The monthly meeting of the W.M.E. which was to have been held at the home of Mrs. Walter Rathwell last week has been indefinitely postponed due to the poor roads.

Frankie Veggo visited on Thursday at Trotter's.

Andrew Blasen is employed at the G. Grech farm, during G. Grech's absence in Edmonton.

We extend our congratulations and best wishes to Mr. Chris Peacock who was married to Miss Jean Rutherford at a quiet ceremony in St. Thomas (Ang.) Church on Saturday last.

Mr. and Mrs. Alf Muddle spent Friday evening visiting with Mr. and Mrs. W. Rathwell.

Mrs. Joe McClellan is spending a few days this week visiting with her daughter Mrs. Ed. Plaxton.

Mrs. F. Anderson and family spent an evening last week at the home of Mr. and Mrs. H. Teeter.

Guests at the home of Mr. and Mrs. G. Grech last Thursday were G. Grech's mother and brother who motored over from Lloydminster.

Mrs. V. Veggo had the misfortune to break his pump during the big snow storm on Saturday and had to call in the neighbors to help repair it.

Mr. and Mrs. Elwood Plaxton spent Sunday at the home of Mr. and Mrs. B. Kitchener.

Messrs Jack and Bill McClellan motored from Lloydminster on Saturday but had to leave their car and walk several miles home because of the drifted roads.

GREENSHIELDS

Mrs. A. Briault and Lawrence were visitors in Edmonton a few days last week.

Mr. and Mrs. Allen Speed and baby son have taken up residence on the former T. Patterson farm, recently.

Mr. and Mrs. Martin Daniels are pleased to announce the birth of their daughter "Linda Louise" at the Wainwright Hospital Sunday, April 4. Congratulations.

Mrs. Saunders left for Edmonton Saturday where she will join her husband.

PLAXTONVILLE

(Last week)

Mr. and Mrs. Philip Wilhelm and family returned home after spending the winter months at Leonard, Ont.

The weekly card party was held at the home of Mr. and Mrs. C. Hecox. A large crowd attended. Ladies first prize was won by Mrs. Art Olson, ladies second by Mrs. W. Sherwood.

Men's first by Mr. W. Schenckel and second by Mr. Clarence Plaxton.

Visiting at their respective homes for the Easter holidays are the Misses Jean Elmer, Mary Teeter, Donna Plaxton and Edith Guthrie.

The school children held a surprise farewell party on Thursday afternoon for the Meyer boys.

(This week)

The card party was held at the home of Mr. and Mrs. W. Plaxton. A large crowd attended. Ladies first prize was won by Miss Mary Teeter, and ladies second by Miss Alice Dickout. Men's first was won by Mr. Ed. Plaxton and men's second by Mr. Ed. Dickout.

Miss Eleanor Plaxton visited for the Easter holidays with Mr. and Mrs. Clifford Fletcher of Fabyan district.

Mr. Delmer Plaxton returned home after spending the winter at Vancouver, B.C.

Mrs. A. Dickout was hostess to the Rosewillow W.L. on Thursday last when they held their monthly meeting at her home. Miss Elsie McNern was the lucky winner of the raffle.

Mrs. E. Meyer and family moved to their home in White Cloud district on Wednesday last.

Mr. and Mrs. A. Roberts visited at the home of their son, Mr. and Mrs. J. Roberts on Wednesday last.

Time Out For Laughs

A beggar approached a man on the street. "Mister, I have had nothing to eat for three days. Will you please give me a dollar?"

"Of course not!" said the man. "If you are that bad off I should think you would be humble enough to ask for a quarter which you, no doubt, would be more likely to receive than a dollar."

"Give me a dollar or give me a quarter, whichever you please," said the beggar, "but please do not tell me how to run my business."

HEATH

Fay and Allen Bouch last last week for Cardston where they will visit relatives. Before returning home they plan to attend the graduation exercises being held at the Prairie Bible Institute at Three Hills on Tuesday, April 6th.

Congratulations are extended to Mr. and Mrs. Elmer Johnson who were married at the Blessed Sacrament Church in Wainwright on Easter Monday morning.

Mr. Bert Walker is the proud owner of a new Hereford Bull which he brought home from the recent Calgary bull sale. This animal, Triumph, Blanchard was purchased by him from the McIntyre Ranching Co. Lethbridge for the sum of \$1000.00.

Last Wednesday the Wainwright Golf Club under the leadership of Mr. S. Robinson, D.A., motored over to Vermilion to visit the Little Royal being held at the Vermilion School of Agriculture on that afternoon. Several members who reside in this district accompanied by their parents were in the party. Everyone certainly enjoyed their visit and it gives one much pleasure to realize what valuable training is received by the students at the Agricultural College.

Patsy Smith returned to her home in Wainwright after spending part of the holiday with her cousin Joyce Bartlett.

Word was received over the week-end by Mrs. M. Herbert that her mother, Mrs. J. W. Cummings, a former resident of this district, is ill, having suffered a slight stroke.

Mr. A. Johnson the new agent for the National Elevator company moved his family here from Irina last Tuesday.

Mrs. M. Overbo who is teaching at the Heath school returned from her home at Jarow where she spent the Easter vacation.

Mr. J. Bartlett returned home on Monday from the Wainwright Municipal Hospital. We are glad to know he is feeling some better.

Rose Willow W.I.

On April 1st a very large attendance turned out to hold their monthly W.I. meeting at the home of Mrs. Dickout.

We opened by singing "Put on Your Easter Bonnet" followed by the creed and theme song.

The minutes were read and adopted. The reports of the various committees were given. The sick committee reporting several baskets of fruit sent.

Mrs. McNern gave an excellent paper called "Alberta Health Committee Reporting". In this paper it stressed the importance of getting diseases checked in their early stages. Also that everyone should have a yearly check up.

The correspondence consisted of several thank you letters and an appeal from the Red Cross which we answered with a \$10.00 donation. Arrangements were made for canvassing the district.

We received word that our group of 100 books are on the way. The ladies that attended the sewing bee finished the quilt top.

More work was turned in to add to the work box.

A lovely layette was turned in to be sent to the district nurses as our objective for April.

After the business was over we called on Mrs. Carey to give us her report on the W.I. conference held in Edmonton last week. Mrs. Carey gave us a very detailed and full report which was greatly enjoyed by all.

At the close of the meeting a lovely lunch was served by Mrs. Dickout assisted by Mrs. Black and Mrs. McNern.

The next meeting is to be held at Mrs. Black's on May 6. We hope for better roads and nicer weather by then.

The entertainment is to be a Mother's Day program.

Notice to Ratepayers

OF M.D. No. 61

The Municipal District has been confronted with the largest snow removal expenditure since the amalgamation and the cost has already taken a large cut into the 1948 Public Works allocations.

The spring run off is bound to do much damage to graded roads and the Council ask the cooperation of each and every ratepayer to help preserve the grades by opening and cleaning the end of culverts, etc., and diverting water courses where same are found to be cutting across the roadways, so that washouts on graded roads and repair costs can be kept at a minimum, allowing the 1948 tax dollar to be used for graveling and construction.

CHARLES WILBRAHAM, Sec. Treas.
M.D. of Wainwright No. 61, Wainwright, Alberta

In The Legislature

By W. Masson, M.L.A.

The present Session of the Alberta
Legislature was prorogued on Wed-
nesday morning, March 31st, after a
rather lengthy and very busy ses-
sion. Considerable legislation, and
a number of resolutions were dealt with
in the last days of the Session.
Amendments to the Labor Act, which
were designed to prevent illegal
strikes and illegal lockouts by im-
posing penalties on both employers
and employees for failing to carry
out the provisions of the Act before
imposing a lockout or calling a strike
were the subject of considerable de-
bate before they were finally passed.While the bill was in the Agricul-
tural Committee, many labor organ-
izations presented their phases to
the House, in which they objected to
the penalties being imposed upon
employees. In no sense can this bill
be considered introduced into labor
legislation, but only as a measure
which will have the effect of getting
both employers and employees to take
every reasonable step to settle their
differences before a strike or lock-
out is called.A number of changes were made in
existing legislation dealing with pen-
sions, which now makes it possible
for both employers and employees to
contribute to a fund from which pen-
sions will be paid upon retirement of
the employees. This can be applica-
ble to any employer and employee
set-up. A Teachers' Retirement Pen-
sion Fund change enables them to
take advantage of the provisions of
the general pension legislation.A number of changes modifying the
Automobile Accident and Indemnity
Act were passed where a person is
obviously not responsible for an ac-
cident, his driver's license will not be
cancelled, and if he deposits a sum of
money or a bond covering damages
for which he may be liable, his li-
cense will not be cancelled. If a driver
has to pay damages because of guilt
in case of an accident, it will not be
necessary for him to take out an in-
surance policy for future protection
if he prefers to do otherwise. Cars
from outside the province involved in
an accident may be impounded in
order to protect injured Albertans,
where the responsibility lies with the
foreign car. In the past it was not
possible for local citizens to take ac-
tion on people outside the province.A Special Committee of the Legis-
lature has been named, consisting of
Honorable Mr. Brooks, H. Hamel of
Edmonton, and H. P. MacDonald of
Calgary, which will make an exhaus-
tive survey before the next Session
of the House, on all phases of auto-
mobile insurance. A resolution was
passed in the House, requesting the
Federal Government to adopt im-
mediately whatever measures maybe necessary to bring permanent and
reserve armed forces to full strength,
in view of the present serious world
situation.A resolution was introduced by the
O.C.F. asking the government to in-
troduce legislation which would al-
low the Canadian Wheat Board to
handle all wheat grain. This request
has been made by the Dominion Gov-
ernment but only to the three prairie
provinces. It may be remembered that
the Canadian Wheat Board is not an
agent of the province, but is an agent
of the Dominion Government. This
would mean that the Dominion Gov-
ernment Board, likely, represented by
Ontario and Quebec, would have a
distinct advantage over the western
farmers, Ontario and Quebec could
sell their grain on the open market,
and then buy cheaper grain from the
Canadian Wheat Board at a lower price
than the open market was favorable.
The Alberta Government is not pre-
pared to take any steps of this kind
until a more definite understanding can
be secured from the Dominion authori-
ties as to the object of the legislation,
the benefits to prairie producers, and
why Ontario and Quebec do not come
under the same legislation. If it is
found necessary, a special session
will be called to deal with this issue.Another resolution asked for a
public enquiry of all gasoline prod-
ucts and increase in prices. The re-
cent high increases across Canada
since the Government removed their
subsidies, have been 4 1/2¢ per gallon
in Montreal, Toronto, Winnipeg and
Vancouver; 5 1/2¢ in Regina and
Saskatoon; 4 1/2¢ in Calgary and
3 1/2¢ in Edmonton. These increases
have been in line with increases in
the U.S. fields of oil production. Tex-
as last year discovered 161 new oil
fields, and this produced in four days
as much crude oil as we produce in
this province in a whole year. It does
not necessarily follow that the dis-
covery of a new field will bring a re-
duction in price, and if it should con-
tinue in this country, resulting in
higher wages and higher costs, it is
very questionable if prices of many
articles will make a downward
change.It has not been possible in the
space of a few paragraphs each week
to bring you all of the highlights of
the recent session. It has been my
hope that the information we have
been able to bring through the cour-
tesy of the Editor of this paper, will
have served some useful purpose in
bringing to the citizens of this prov-
ince, the information to which they
are entitled.On behalf of the readers of this
paper, I extend my thanks to the
Editor.

DR. F. J. ORRANEY

Line Elevator Farm Service.

MORE ABOUT SEED TREATMENT

Line Elevator Farm Service offers
no apology for again emphasizing
the importance and value of seed
treatment for small grain crops,
including flax, in 1948.At the recent annual meeting of
the Associate Committee on Plant
Diseases (Dominion Department of
Agriculture and National Research
Council), plant pathologists and
other crop specialists emphasized
the importance of seed treatment
in reducing the ever-increasing losses
from smut and other seed-borne
diseases of grain crops in Western
Canada, and recommended that
seed treatment be more widely and
adequately practised by prairie
farmers this year.Seed Treatment Recommendations.
A brief, general interpretation of the
official seed treatment recommenda-
tions for 1948 is as follows: (1) All
wheat seed should be treated with
an appropriate fungicide, unless it
has been examined by accepted
methods and found to be sound,
healthy, and free from surface-
borne smut. (2) It should be re-
cognized, however, that, even in the
absence of smut, seed treatment
may be beneficial in protecting the
seed against soil-borne diseases
such as pre-emergence blight, seedling
blight, and root rot. (3) All
seed of oats, barley and flax should
be treated with an appropriate
fungicide. (4) In the treatment
of seed grain farmers should fol-
low precisely the instructions and
directions of the chemical
manufacturer.Avoid Disease Losses. Farmers
can avoid smut and other disease
losses in 1948 by properly treating
the seed they sow this spring. No
farm practice will yield a greater
return for the same investment
in money and time than will seed
treatment. For information on
seed treatment, consult your local
Agricultural Representative, or
write to the nearest Dominion
Laboratory of Plant Pathology
(Winnipeg, Saskatoon, or Edmon-
ton), or to the Line Elevator
Farm Service, Winnipeg or Calgary.

The color experts have come up with a tip that can be a big help in making that long, narrow room look more livable. They suggest that such a room can be made to look wider and shorter by painting the two end walls a darker color than the long side walls. By the same token, square rooms can be given the illusion of extra length by painting the side walls in a lighter shade of the same color as is used on the end walls.

The Canadian Potato Industry Modernize Farm Homes Now Possible

The potato industry of Canada is one with which the average Canadian is not too familiar. Few are aware of the real importance of potatoes in our agricultural economy or in the adequate nutrition of Canadians, says Mr. N. M. Parks, Division of Horticulture, Central Experimental Farm, Ottawa.

The potato has a wide adaptation and succeeds well in most areas in Canada. Potatoes are cultivated in practically every settlement even up to, and within, the Arctic Circle. Interest in the crop ranges from specialist growers to market gardeners, and anyone who has a few square yards of land to cultivate in his spare time.

The potato is the fifth most important Canadian field crop in gross farm value, and is the most important vegetable grown in Canada for human consumption. In 1947 the per capita consumption of potatoes in Canada was 217 pounds, while the total of all other vegetables consumed, both fresh and canned, was 196 pounds per capita. Potatoes are high in ascorbic acid (Vitamin C), the B Vitamins and also in iron.

The relative importance of the potato crop in Canada varies with the different provinces. To the three Maritime Provinces, the potato crop is of greater importance than in other Provinces in Canada. In these three Provinces, potatoes make up a large part of their total agricultural revenue. Prince Edward Island, Nova Scotia and New Brunswick, grow approximately 36 per cent of the total acreage of potatoes grown in Canada and produce 38 per cent of the total production. Ontario and Quebec grow 53 per cent of the total acreage and produce around 44 per cent of the total production. Under average conditions, these two Provinces have to import several millions of bushels of potatoes each year to meet their need for table consumption and for seed purposes. They are imported chiefly from New Brunswick and P.E.I. The three Prairie Provinces, Manitoba, Saskatchewan and Alberta, grow 17 per cent of the Canadian acreage of potatoes and produce just around 14 per cent of total production. British Columbia grows the remaining 4 per cent of the acreage and produces 4 per cent of the total Canadian production.

An important phase of the potato industry in Canada is the production of high quality certified seed. Several million bushels of certified seed potatoes are exported each year from Canada to many foreign countries. From the 1947 crop, certified seed went to United States, Bermuda, Cuba, Mexico, Panama, Dominican Republic, British West Indies, Argentina, South Africa and Palestine. Canadian Certified seed potatoes are held in very high regard by importers in these countries. There is an increasing demand from other countries for high Canadian certified seed potatoes and the exports of seed from the 1947 crop may exceed all previous quantities exported.

A considerable quantity of the annual potato crop in Canada is processed into such products as potato flour, potato starch, glucose, dehydrated potatoes and potato chips.

Fix Maximum Speed On Alberta Roads

Motorists are restricted to a maximum speed of 55 miles per hour on Alberta highways, under the provisions of a bill to amend the Vehicle and Highway Traffic Act which was approved by the legislature last week. The house also placed its approval on a section which provides that the maximum speed limit is 45 miles per hour at night.

During the debate on the bill in the legislature, attention was drawn to the objection which the Alberta Motor Association had registered against the bill. The A.M.A. contended that the present law should be maintained, requiring motorists to drive at a reasonable rate and having due regard to the circumstances. The A.M.A. says that a speed of 55 miles per hour might be justified at certain times and on other occasions it might be dangerous.

Attention also was drawn during the debate to the fact that many of the states have eliminated the maximum speed law and returned to the flexible rate law which has been in operation in Alberta.

Government speakers claimed that while a maximum speed was being set, the provisions as to a reasonable rate of speed still are in effect.

THE B. P. SHOW
presented by
Edmonton Tire Co. Ltd.

8:30 p.m. Wednesday

C. J. C. A.

The Farm Improvement Loans Act, recently enacted by the Dominion Government, has been of great assistance to the Canadian farmer in aiding them to modernize their homes, buildings and equipment, stated J. L. Demers, president of the Canadian Institute of Plumbing and Heating.

Under this act, passed in 1944, more than \$24,000,000 has been loaned to Canadian farmers to assist in repairing and remodeling their homes, making additions, painting and decorating, and installing modern conveniences.

A new era of improved farm efficiency and rural home convenience is developing in Canada, said Mr. Demers. "Just as several decades ago the farm tractor began to replace the horse and the conveniences of radio and automobile spread from city to the farmstead of today there is a widespread move to complete the modernization of the farm by installation of modern plumbing and heating equipment. The increased farm income and the rapid spread of electrification in rural areas makes this dream possible."

"Research into the problems of economical installation of equipment on the farm is being carried out in several centres of the Dominion. In addition, informational pamphlets and booklets are being prepared for the use of farmers in planning their farm improvements."

"Although plumbing and heating materials are still in short supply and may continue to be so for some months, the plumbing and heating industry is now trying to meet the needs of the farm districts. Until production is able to overcome present shortages caused by the post-war construction boom rural residents can proceed with planning installations to meet their needs."

Mr. Demers pointed out that the labour saving value of plumbing around farm buildings as well as in the farm home, is important in operating a farm today with greater competition and increased costs of labour.

Many Colors Not Named

Talk about "more than meets the eye"—it turns out now that as far as color is concerned, there's more that meets the eye than meets the vocabulary.

The Inter-Society Color Council reports that the human eye can distinguish, among some 2,000,000 color shades, so far, only 7,044 of these colors and their shades have been tabulated—and to describe these 7,044, our language has only about 3,400 words. Most of us get along with less than 1,000 color names, although the color vocabulary of painters and decorators is apt to be considerably higher than the average.

Someday no doubt somebody will get around to naming all the tabulated colors at least. We hope, though, that it will be possible to avoid the type of names which sprang up in the 18th century, only to die out after a generation—names such as Rash Twa, Stiffed Sigh, Paris Mud, Burnt Opera House, Elliott's Red Hot Bullets and even "The Smoke of the Camp of St. Roche" which would be a mouthful on any paint can.

Surplus Pollen

The honeybee colony, under normal circumstances, stores only a sufficient amount of pollen to provide for the developing brood, for other dietary needs and a small surplus to tide the colony over a period of pollen dearth. A queenless colony frequently stores much surplus pollen which may or may not be entirely utilized after the colony has been requeened, depending upon the season of the year and the flora that is in bloom. Beekeepers in some areas report a large surplus of pollen, in other areas it is necessary to feed pollen substitutes to make up the deficiency.

A brood-rearing frame, having more than one-half to two-thirds of the cells filled with pollen, is termed "pollen clogged" by the beekeeper. At the Dominion Experimental Farm, Brandon, Man., the combs containing too much pollen are segregated every fall and set aside for use in colonies short of pollen in the spring. The bees should be changed every second day. After five days the water is shaken from the combs by hand or removed by whirling them in the extractor, and then stored at room temperature until June. Mould develops very rapidly, but strong colonies in June remove the mould and shrunken pollen masses without much difficulty, making the frame useful again for brood-rearing purposes.

Pollen clogged combs may be renovated by soaking them for five days in a barrel or stock tank filled with water and kept at room temperature. The water should be changed every second day. After five days the water is shaken from the combs by hand or removed by whirling them in the extractor, and then stored at room temperature until June. Mould develops very rapidly, but strong colonies in June remove the mould and shrunken pollen masses without much difficulty, making the frame useful again for brood-rearing purposes.

Pollen combs may be stored for an indefinite period and still provide suitable stores for the bees. However, old or stored pollen will seldom be used by the honeybees when fresh supplies are available in the fields and the weather is suitable for gathering it. Consequently, surplus combs of pollen should be made available to the bees during a period when pollen is scarce or when the colony is developing rapidly and fresh supplies are short.

CONTINUATION OF SCHOOL DIVISION TO ISSUE DEBENTURE FOR NEW SCHOOL AT CHAUVIN

Continued from Page 1
Some discussion and the Board felt that this part of the building program could no longer be delayed. Since the issuance of debentures will be necessary for the building of this school, the following by-law received its first, second and third reading with the full support of all Board members.

Moved first by Dr. Polkema, second by Mr. Sanders and third by Mr. Spencer that the following by-law relating to the issuance of debentures be passed. Cd.

Moved by Mr. Sanders that accounts be paid in the amount of \$16,164.36 and that the same be included in the minutes of this meeting.

Cleaning up the Storage

Most stored products, such as fruits and vegetables require a moist atmosphere. Unfortunately this is an excellent condition for the development of organisms and moulds. These moulds feed on the structural parts of the storage, bringing about disintegration and ultimate destruction. If an examination is made in the spring of joists, rafters and inside sheathing of a storage moist spots will be seen, and often a mouldy or partially rotted condition. Frequently these conditions exist where casual inspection is not easy. These moulds also give rise to musty odours which are frequently absorbed by the fresh produce, giving them an undesirable taste, says W. R. Phillips, Division of Horticulture, Central Experimental Farm, Ottawa.

The first step in correcting this condition is to remove all remaining produce when the storage season is over. Often an extra bag of potatoes

or a basket of apples is left in a corner of the storage, and is not removed until decayed. The clean-up must be thorough and must include all the odds and ends which so often lie in a corner, or are wedged in the opening of a rack.

The second step is to clean the storage. If drains are convenient, water can be used. Where there are dirty spots or mouldy areas, a wire brush or an abrasive should be used to remove them. This is the most tedious part of the job, but thoroughness is essential.

After this is done and the excess water is swept out, a fungicide should be applied. There are many on the market which are satisfactory, most by liquid, and they can be sprayed on or applied with a brush according to directions. The purpose of the fungicide is to thoroughly kill the existing organisms. It should also be non-corrosive to the applied surface, and should not leave odours

harmful to the product stored subsequently.

After the fungicide has had sufficient time to do its work, the storage should be washed down again with water and then be thoroughly aired. Fresh air and sunlight are the best disinfectants that can be used. Leave doors and windows open all summer, as this helps in killing moulds in inaccessible places. It also dries insulation or structural parts which might not have been moisture-proofed. All removable parts such as racks and dunnage lumber should be left out in the sun until thoroughly dry and then kept in a dry place until needed.

Thorough cleaning of the storage as frequently as possible, will reduce maintenance and repair costs, as well as providing more efficient storage, and a superior product.

Red Cross Services Cannot be Neglected—King

Funds collected in the Red Cross national appeal for \$3,000,000 this month, will support services which cannot be neglected without harm to health and welfare of the Canadian people," Prime Minister W. L. Mackenzie King said today in a special statement urging Canadians to contribute.

"The Canadian Red Cross Society depends upon the voluntary support of the people of Canada," Mr. King said. "In contributing to the Red Cross appeal citizens will be performing a humanitarian service of nationwide significance."

Red Cross services to which the Prime Minister referred and which will be financed from the \$3,000,000 appeal in 1948, include: the extension of the free National Blood Transfusion Service, already operating in British Columbia and Alberta; Disaster Relief; the continuance and expansion of the Outpost Hospital and Nursing Station services now active in 71 frontier communities of Canada; Crippled Children's work; free public instruction in swimming and water safety; First Aid, Home Nursing and Nutrition; and other work for the improvement of health, the prevention of disease and the relief of suffering.

"Red Cross commands the approval of all political parties in Canada and of all persons of good-will," the Premier said.

When repainting, enamelling or varnishing stony surfaces, the surfaces should be lightly sandpapered to provide a "tooth" for the new coating to insure good adhesion.

Human Interest Stories Arthritis Association Formed in Canada

By Rita Ross

On several occasions I've outlined the critical need for some action to cope with the increasing number of arthritic patients, and the tremendous hardship resulting from persons crippled by this illness.

In 1934 Holland began special studies of Arthritis and began providing special facilities for treatment. As a result this idea has been spreading to many countries. In Sweden two thousand hospital beds are already provided for Arthritis treatment alone and at the moment accommodation for another three thousand is being constructed. In 1934, Canada possessed no facilities and only about five medical men who were interested in specialising in the subject. In 1936 Western Canada did lead the way in this country by providing 60 beds for arthritis treatment, yet little more was done.

However a group in Canada continued agitating for some improvement and in June 1946 the Hon. Brook Claxton provided a special grant for research that Grant has not yet been done.

Finally in June 1947 the matter was again brought on to the floor of the House at Ottawa. Questions directed to the Hon. Paul Martin that day provided the following interesting official statements. Only about ten specialists in Canada are devoting full time to this work. No post-graduate studies are provided although such courses are now being provided in both Britain and the United States. During the period from 1939 to 1946, the National research council spent just over 33 thousand on Arthritis research—less than five thousand a year, specialised accommodation for such patients can be obtained only in the 90 bed Banff ward and in the Sunnybrook Veterans' hospital in Toronto. This return to Parliament by the Federal Minister, goes on to declare that at least half a million Canadians suffer from Arthritis and that of these about 45 thousand would be under 20 years of age. According to further investigation the Federal department believes that about 5% of the total population would be affected, making it by far the most prevalent ailment in Canada. That plus the fact that unknown thousands are crippled in various degrees would seem serious enough, yet these cold official figures tell us that Arthritis is one way or another directly kills almost as many as does Tuberculosis. Yet for TB we have free hospitalization, tremendous research expenditures, and endless concern, in the other we have a dozen experts, about five thousand a year and a couple of hundred beds.

After considerable publicity, conference was called in Ottawa last October and the whole subject was seriously discussed. The Federal Government made no commitment but it did offer assistance in the formation of an association to devise ways and means of combating the ailment. A further meeting opens in Ottawa today at which the Canadian Arthritis Society will come into being. In brief, the patients are forming their local branch of this same Society and plans are being made for the formation of a Province wide organization.

Thus after years, the first step is being made, but there is still a long way to go.

In spite of the Alberta Deputy Minister taking part in the Ottawa conference, the Provincial department apparently still does not contemplate any definite action. As recently as December the 10th, it was stated by the department that insufficient information was available to warrant the setting up of institutions for treatment of arthritic patients. The letter goes on to say that the Dominion and Provincial Governments are taking steps to speed up research, and that when some form of treatment is found the department will do everything possible to make treatments available. But that doesn't mean much to a person now crippled. On the other hand there is little point in providing facilities until it is known what kind of treatment is worth using. Thus the first important step is to speed up that research and the sooner that is done, the sooner these half million Canadians

will get some relief. That is the task that is still before us. That is the task which this new Arthritis Association is going to tackle along with the Government agencies, and that is something that can mean much for at least 5% of the people listening right now.

I haven't saved stamps since as a BB rifle, but it was a way out. Regularly since then a bundle of stamps arrives "with grateful thanks from Maurice and George".

However, I am now on "my way" helping two kids save enough stamps for BB guns.

The prospective father-in-law was interviewing his daughter's young man.

"And what are your prospects?" he inquired.

"Oh, pretty good! Unless your daughter's misled me," was the answer.

will get some relief. That is the task that is still before us. That is the task which this new Arthritis Association is going to tackle along with the Government agencies, and that is something that can mean much for at least 5% of the people listening right now.

Accident Fund Levy In Effect For 1948

Hoped officials of the Alberta Motor Association for suspension this year of additional \$1 charge on motorists for the government's unsatisfied judgement fund under the Motor Vehicle Accident Act were wiped out last week.

A bill which includes amendments to the Act provides for the levy being continued this year at least. At April 1947.

the same time, the benefits under the Act are broadened. For instance, claims by those injured in accidents and unable to recover from defendants are extended to include payment of medical bills for injuries. Formerly this provision was confined to hospital bills.

The bill also makes provision for impounding of cars in certain cases, with provision for their restoration later under certain circumstances. Provision is also made in the Act for suspension of drivers' licenses until it is shown that claims for damages have been paid, or other steps taken to meet the requirements of the legislation.

It has been estimated that the judgement fund amounts to around \$100,000. Few claims have been made since the Act went into operation in April 1947.

ARE YOU GETTING THE TAX DEDUCTIONS YOU ARE ENTITLED TO?

The Farm Account Book and Income Tax Guide shows you how!

How much can you deduct for depreciation on your tractor? Your automobile? A shed? What expenses can you deduct? There are 75 articles in common farm use plus a wide variety of deductible expenses for which depreciation can be charged—all listed in the new Farm Account Book. These legal deductions from your income are a big question at Income Tax Time and the answers to them and to dozens of other questions are in this new Farm Account Book.

A Record of Your Transactions and a Guide to Your Income Tax Return

WHAT IT DOES—Keeps a clean record, helps you budget—and shows you whether you have made or lost money on your operations. Shows you, too, what your best lines are and where you may be farming at a loss. Saves you hours of time from book keeping. First ten pages are for your receipts—from sales of crops, seeds, livestock, poultry, dairy products and all other produce. Then come twelve pages of all farm expenses—you are reminded of items you might otherwise forget. Establish a basic herd, apply for the three-year-average plan, calculate your depreciation item by item. These are money-savers for every farmer. They're all in the new Farm Account Book.

DEDUCTIONS—Every farmer is entitled to deductions and he is expected by the department to take full advantage of his rights. The Farm Account Book tells you about many items in easy question-and-answer form. For instance—"What can I claim as expenses for repairs?" The answer is "any expense to keep a machine or a building in working order can be claimed." Altogether there are answers to over 60 questions. No one is required to

pay more than his fair share of tax. Comments from Letters on the New Farm Account Book and Income Tax Guide. "A long awaited step for the benefit and progress of our Canadian farmers." "Takes the kinks out of keeping farm records." "Pleased to recommend this Account Book for farm people." "Record keeping in its simplest form—a real help!" "Something we have been needing for a long time."

Notice

The Council ask that all residents and the travelling
public cooperate with the Municipal Districts in observ-
ing the Road Ban on District Highways and Local Roads
that will come into effect very soon, and urge all truckers
to govern their hauling commitments accordingly.

With so much snow in the district, road conditions will
be very bad during the break-up, and the Road Ban will
be strictly enforced to save the taxpayers the cost of
damage done by heavy traffic during the period.

Your consideration in this matter will be appreciated.
Charles Wilbraham, Sec.-Treas.
M.D. of Wainwright No. 61
Wainwright, Alberta.

Sale by Tender

Tenders will be received at the Office of the Secretary-
